

User Story Testing

Please follow the below instructions and provide check or cross items you were able to complete

1. User Profile/Dashboard

- 1.1. Signup with your email and password
- 1.2. Attempt to create another account with the same email address (verify error message appears)
- 1.3. Sign in with created login details
- 1.4. Click Dashboard displays all brew logs
- 1.5. Logout
- 1.6. Login again
- 1.7. Cancel account
- 1.8. Re-attempt to login (should be unsuccessful) verify error message.

2. Add Log in Dashboard

(Create a new account and login for this section)

- 2.1. Attempt to submit a log that is empty (Should be unsuccessful)
- 2.2. Attempt to submit a log with an empty name field and verify that the relevant error message appears.
- 2.3. Attempt to submit a log with an empty brew date field and verify that the relevant error message appears.
- 2.4. Attempt to submit a log with an empty duration time field and verify that the relevant error message appears.
- 2.5. Attempt to submit a log with an empty alcohol level percentage field and verify that the relevant error message appears.
- 2.6. Attempt to submit a log with an empty ingredients field and verify that the relevant error message appears.

- 2.7. Submit the log, verify you receive a pop message of added log and verify the log is visible in your dashboard.
3. Edit Log in Dashboard
 - 3.1. Try editing a log, ensure the Edit log page reveals previously added information regarding the brew.
 - 3.2. Click Update Log, ensure you receive the relevant message of update.
 - 3.3. Return to your dashboard, view the edited log and verify changes are updated.
 - 3.4. Click Edit on a Log again, this time click the Cancel option, verify that you return to your Dashboard.
4. Delete Log in Dashboard
 - 4.1. Attempt to delete a log by clicking option "Kill" and verify that you get a confirmation message and that you return to your dashboard
